Functional Requirement	User story	No of activity	Team members
TABLES	<b>As a database administrator</b> , I want to create and manage the asset inventory table so that all asset information is organized and easily retrievable.	2	S revathi
UI ACTION	<b>As a system user</b> , I want to use UI buttons like <i>Mark as Lost</i> , <i>Repaired</i> , or <i>Damaged</i> so that I can update the asset's condition efficiently.	3	T pravallika
SCHEDULED JOB	<b>As a system scheduler</b> , I want to automate warranty expiry alerts so that assets can be serviced before the warranty ends.	1	S vijaya
REPORT	<b>As a data analyst</b> , I want to generate pie chart reports showing the distribution of asset statuses so that I can quickly visualize asset usage.	1	S vijaya
TESTING	<b>As a quality assurance tester</b> , I want to validate UI actions and scheduled jobs to ensure they work as intended and maintain system reliability.	2	S swathi
